EDUCATION

The Maharaja Sayajirao University of Baroda June 2021 – May 2025
BE - Computer Science and Engineering CGPA : 8.7
Vadodara, India

Vasishtha Genesis School June 2019 – May 2021
HSC , Percentage : 93.38 %
Bardoli, India

EXPERIENCE

- **Software Engineer – Alois Solutions** June 2025 – Present
  - Contributed to a fintech web application with secure authentication, transaction workflows, and user management.
  - Implemented CI/CD pipelines using GitHub Actions and Docker for streamlined testing, integration, and deployment.
  - Deployed the project infrastructure on AWS using services like EC2 and S3 to ensure scalable and reliable performance.
  - Integrated AI-powered chatbot interactions using **FastAPI** to enable communication between users and AI for strategy recommendations and feedback collection.
- **Software Developer Intern – Alois Solutions** Jan 2025 – June 2025
  - Contributed to the development of full-stack web applications for exam, survey, and school management systems using the MERN stack.
  - Implemented secure role-based and feature-based access control across multiple platforms to manage users, permissions, and workflows.
  - Built scalable modules for online coding and SQL exams, aptitude tests, and surveys with exam security features and real-time feedback.
  - Developed a school management system supporting multiple schools, teachers, and students with integrated chatbot functionality.
  - Ensured robust data management and real-time communication using RESTful APIs with both **relational (PostgreSQL)** and **NoSQL (MongoDB)** databases.
- **Web Developer – FootPrint's 24 , MSU** Dec 2023 – Dec 2024
  - Contributed to the development of the official website for FootPrint's 24 event at MSU.
  - Demonstrated collaborative and project management skills while working with the event organizing team.

SKILLS

- **Core Skills :** Competitive Programming , Object-Oriented Programming (OOP) , DBMS
- **Programming Languages :** Java , C++ , JavaScript , TypeScript , Python
- **Database :** MongoDB , MySQL , PostgreSQL
- **Frontend Technologies :** React.js , Next.js , Redux , React Query , Shadcn/UI , Tailwind CSS
- **Backend Technologies :** Node.js , Express.js , Spring Boot , FastAPI
- **Cloud & DevOps :** AWS (EC2, S3, CloudFront, Cognito) , Jenkins
- **Tools :** Git , GitHub , Postman , Firebase

PROJECTS

- **Jansho's Mart :**
  Tech : Node Js , Express Js , React Js , MongoDB , JWT , Tailwind CSS
  - Developed a full-featured eCommerce platform with user and admin roles using the MERN stack.
  - Built secure RESTful APIs for user authentication (JWT), product management, and order processing.
  - Designed a responsive frontend with React.js and Tailwind CSS, including dynamic shopping cart functionality.
  - Implemented an admin dashboard for managing products, users, and orders in real time.
- **PG- Dissertation System :**
  Tech : Spring Boot , MongoDB , React Js , Bootstrap , Ant Design UI
  - Developed a full-stack web application for managing postgraduate dissertations using Spring Boot and React.js.
  - Built RESTful APIs to handle dissertation proposals, file uploads, task assignments, and review tracking.
  - Implemented role-based access for students and guides with secure data flow and access control.
  - Designed intuitive dashboards for students to submit proposals, upload documents, and communicate with guides, while enabling guides to assign tasks, track progress, evaluate work, and manage approvals.
  - Integrated real-time notifications and tracking features for timely updates and workflow visibility.
  - Utilized MongoDB for efficient and scalable storage of user, proposal, and document data.
- **Intelligent Fogponic System**
  Tech : Python, Scikit-learn, Streamlit, Pandas, NumPy, Matplotlib
  - Developed ML models to predict optimal light interval, fan interval, NPK values, and plant health in fogponics-based systems.
  - Applied and compared multiple ML algorithms with feature engineering to improve prediction accuracy for environmental control.
  - Designed an interactive dashboard using Streamlit for real-time monitoring and parameter adjustment.
  - Visualized data trends and model outputs using Matplotlib for better insights and decision-making.

CERTIFICATIONS & ACHIEVEMENTS

- **AWS Cloud Computing Workshop –** Learned core AWS services like EC2, S3, and IAM. (MSU, June 2024)
- **Solved 500+ coding problems** on platforms like LeetCode and GeeksforGeeks.
